

Wattle is now Heimgard!

Wattle have changed its name to Heimgard.
We are the same company. With the same
smart technology. Just as open and flexible.
Just as uncompromising when it comes to security.

Next generation smart home!

Completely flexible. Completely secure.

Photo: Getty Images

Smart home the way smart homes are meant to be.

Complete freedom to choose and combine
different brands and systems. And completely
secure. All data are private and theft-proof.
Completely flexible. Completely secure.
The way a smart house is meant to be.

Completely flexible.

One app. To easily and securely control whatever you want in your home. It's compatible with other smart products and services. The way a smart home should be.

- Lightbulbs from Philips Hue or IKEA
- Electronic door locks from several producers
- Thermostats and dimmers from ELKO
- Sensors from Samsung SmartThings
- Google Assistant
- And many more

Completely secure.

Unique technology. No username or password to lose track of. All data are kept locally in your Heimgard hub. Your own closed ecosystem where your data are completely private and theft-proof. We never compromise on security. That's what makes it really smart.

A sense of security and comfort.

With smart home technology you can easily control all electric devices in your home by using your phone, the control panel or your voice. Lights, heating, locks, alarm, security cameras and much more. A smart home is more energy-efficient, makes your everyday life more practical and gives you a sense of comfort and security.

Electronic door lock

Smart, electronic door lock is easy, secure and flexible.

Security and alarm system

Keep an eye on your home. Monitor and adjust easily with smart security products.

Indoor climate and lighting

Smart control of lighting and heating saves money and creates atmosphere.

Energy control

Save money and energy without compromising on comfort.

Your home

How smart do you want your home to be?

It's up to you. Heimgard can connect with and control many smart things. Start with a few articles, fall in love and add more when you want!

PS!

Works wonderfully with Philips Hue, IKEA, Osram, Samsung SmartThings, Google Home. Just to mention a few.

Fast Smart home hub

The brain of the system. Several models. With or without mobile broadband. Connect it to the Heimgard app and you are ON.

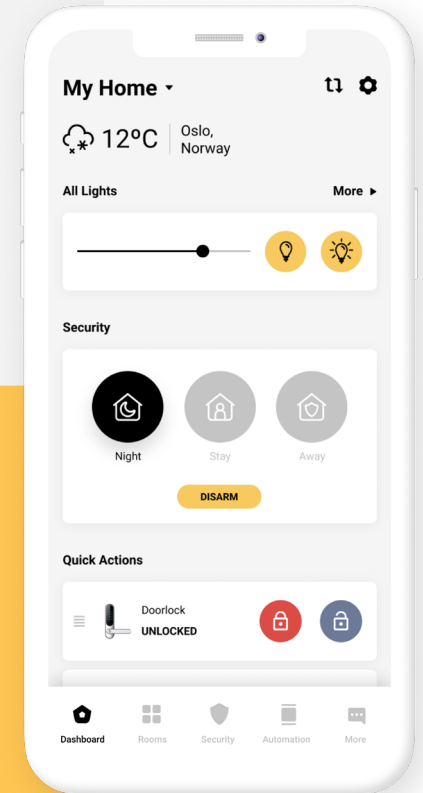

Electronic door lock

Forget your keys

Smart, electronic door lock. Unlock it using a code, with a chip, fingerprint or the Heimgard app. Easy, safe and flexible.

Let the plumber in while you are at work. Go for a run without your keychain. Use the app to control whether the door is open or locked.

Electronic Door Lock

Electronic Door Lock. Personal code and RFID chip. Can be easily upgraded to be controlled from the app. Available in black and white.

Electronic Door Lock Smart

Electronic Door Lock. Personal code and RFID chip and app. Available in black and white.

Electronic Door Lock Fingerprint

Electronic Door Lock. Personal code and RFID chip, app and fingerprint. Available in black and white.

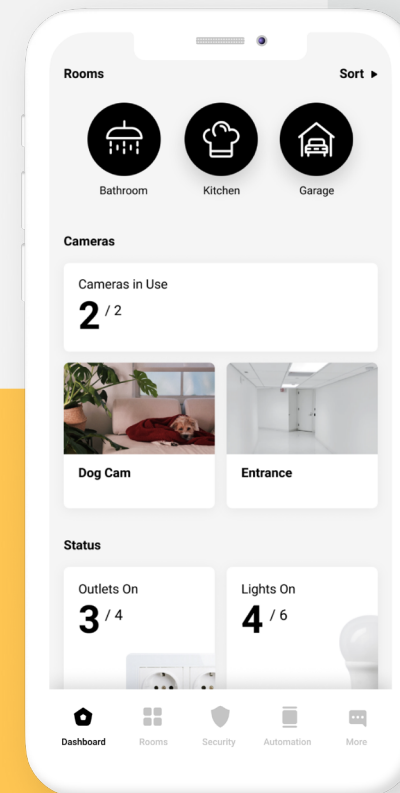

Security and alarm system

Security is comfort.

Sleep safely and securely in a home with Heimgard's flexible and future-smart alarm system. Can be connected to 24/7 alarm central. The system also supports everything from lighting and heating to camera surveillance and energy control.

Use the app to keep an eye on your home. Turn on the outer security. Activate the frost protection. Does the roof of your cabin need snow shoveling? Did you remember to lock the door? Or blow out the candle in the living room? Is the dog doing ok at home alone? Sit back, relax. You are in control.

PS!

Receive notifications on your phone. Your phone will alert you if the system detects smoke, uninvited guests, leakages and much more.

Indoor Cameras

Practical and discreet for use at home. Movement sensor and notification. Video recording on-demand. Night vision. It can all be controlled through the app.

Outdoor Cameras

Keep an eye on your driveway, garage, shed and garden. Movement sensors with notification. Video recording on-demand. Night vision. All of this can be monitored through the app.

Optical Smoke Detectors

Protects you and your home. Runs on battery. Notifies with a powerful siren and through the app.

Water Leak Detectors

Notifies you automatically if there is a water leakage. Runs on battery. Sends push notifications through the app if water is detected.

Indoor climate
and lighting

Magical lighting and heating.

Warm, soft and comfortable lighting for a relaxing evening. More light for homework and the home office during the day. Automatically controlled lighting in rooms like bathrooms, hallways and garages. Set the temperature. Adjust the heating thermostats. Turn off the heat when you are airing out the rooms. Create the perfect indoor climate and atmosphere.

Use the Heimgard app to control lights and heat in your home or cabin. Whether you are here or there.

Door and Window Sensors

Can control light and heat so you get exactly what you want. Battery driven and controlled through the app.

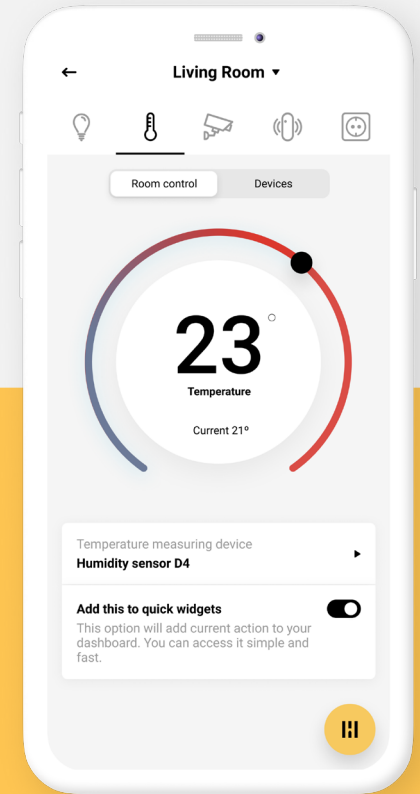

Smart Plugs

Add new functionality to your existing gadgets and lights. Define schedules, scenes and automation rules. Many possibilities. It's all controlled through the app.

Temperature and Humidity Sensors

Contribute to a comfortable and healthy indoor climate. Set smart rules for everything from heaters to de-humidifiers. Monitor levels in the app.

PS!

Let your cabin know you are on your way with a gentle tap in the app. Arrive to a nice, warm and cozy cabin.

Energy control

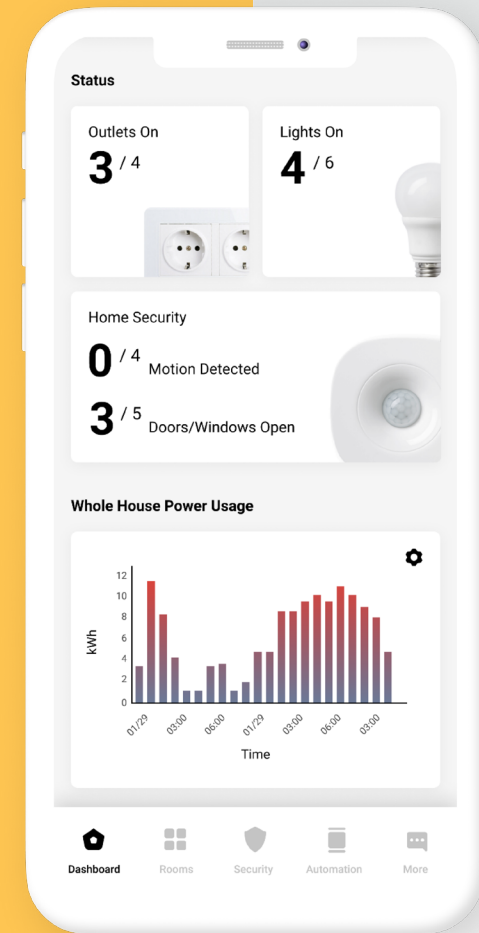

Energy saved is money made.

Save money with smart energy control without sacrificing comfort. Use smart plugs. Endless possibilities. Minimal investment.

Stay in control of your energy spending at all times. Before the electricity bill runs wild. Lower the temperature when you are not at home. Postpone water heating until the middle of the day when the price of electricity is lower. Lots of possibilities at a low cost.

Energy Meter HAN (NO)

Offers detailed information about your energy consumption in real time. Receive notification on your phone if it is unusually high. Define your own criteria. Reduce your energy bill. It's all controlled through the app.

PS! The next generation smart home from Heimgard is easily controlled through the app. Using smart panels, buttons or your voice.
