Mini SIM card sticker

B.  
Power cable

Not Included

D.  
Mini SIM card

# Device overview

# Device overview

1.

Some SIM cards are too thin and require you to add the SIM card sticker (C) onto your SIM card (D) to ensure a proper fit.

Remove the protective layer on the SIM card sticker (C) and place the sticker on the Top of the SIM card.

2.

Insert the Mini SIM card (C) into the SIM card slot (H).

3. Connect the **Power cable (B)** to the **Hub (A)** and plug in the power adapter into a wall socket

4. Turn on the power by pressing the **Power switch (D)**. The **LED light bar** will indicate power is on when the light appears above the power symbol.

5. You are ready to connect to the WiFi when a light appears on **LED light bar** above the 2.4 and/or 5 and you signal indicators.

It may take up to 3 minutes for your system to connect.

See the SIM card troubleshoot page if you

6. Connect your laptop or other internet enabled device to the wireless network.

The WiFi network name (WiFi SSID) and Password can be found on the bottom of your Hub

You will now be connected to the wireless router, but you may not be able to access the internet without entering the SIM card's PIN code.

7. Open your web browser and enter:  
`http://192.168.8.1`

8. Your web browser may inform you that your connection isn't private.

Click: **advanced**

Click: **continue to 192.168.8.1**

9. You will now be prompted to enter a Username and Password

Username: **admin**

Password: **admin + last 4 digits of IMEI#**

(example): **admin1234**

Locate the last 4 digits of your IMEI number on the bottom of the Hub.

After a successful login, you will be prompted to change your password. **This is not required.** If you change your password you will have to login again.

10. Enter the PIN provided by your SIM card provider

Click: **Verify**

Click: **OK**

Under the Pin Management tab

Click: **Disable**

Enter: **your PIN code**

Click: **Apply**

# 11.

Download the Heimgard app

Click the **getting started** tab and follow the in-app instructions

## Troubleshoot

Check that the cables are inserted correctly

**Note:** It could take up to 5 minutes for your hub to start. The software may be updating.

If you are experiencing any abnormal behaviour you can perform a **Factory Reset**.

**Note:** This process will delete your existing system and reset it. You will need to reconfigure all your devices after the reset.

You will need a pen. Press and hold reset button (G) for **5 seconds**. The process can take upto 5 minutes to successful reset. You will now need to reconnect be able to connect to your device.
