(lähetys/vastaanotto)

A bit of info

LYNX1008 is a powerful, high-performance Gigabit Ethernet switch, with 8 ports all capable of auto-detection of speed, duplex (NWay) or crossover (MDI-X). Put simply, the LYNX1008 will connect any device fully automatically without any configuration from you the user.

It is ideal for adding more wired devices to your current networks, simplifying your wired network into smaller segmented subnets. Gigabit Ethernet allows for improved performance enabling the bandwidth for demanding multimedia and imaging applications in use today.
